Refined High Performance Granule

Processing

Thermozell pro 600 speed

Thermozell 200 Liter + 3 bags of cement (25 kg) + 28 – 33 liters of water

Thermozell pro 250 speed

Thermozell 200 Liter + 1.5 bags of cement (25 kg) + 15 – 18 liters of water

Thermozell pro 400 speed

Thermozell 200 Liter + 2 bags of cement (25 kg) + 20 – 25 liters of water

Thermozell pro 160 speed

Thermozell 200 Liter + 1 bags of cement (25 kg) + 12 – 13 liters of water

The mixing process with the addition of cement and water takes place at the construction site. Different amounts of cement are added to produce the product types pro 600, 400, 250 and 160 speed with the respective properties.
